Ida Infront receives order from the Swedish Police Authority

STOCKHOLM, December 20, 2018 - Addnode Group's subsidiary, Ida Infront, has been given renewed trust from the Swedish Policy Authority for managing and further developing the Police Authority's iipax-based systems in case management, e-archiving and secure information exchange. The transaction has an order value of approximately MSEK 45 over three years and is in line with existing commitment.

For many years, the police authority has used Ida Infronts product iipax for a number of applications, all of which have high security, traceability, robustness and performance requirements. The agreement concerns consultancy services for managing and further developing the Police Authority 's various versions of iipax in case management, e-archiving and secure information exchange.

"It is very pleasing that the Police Authority is still conducting its digitalization with iipax, which offers complete support from secure information exchange and case management to long-term archiving". Says Stefan Jonegård, CEO of Ida Infront.

The Ida Infront product iipax features features for efficient case management, sustainable email archiving and secure information sharing. The product is available for a wide range of authorities, but also for private companies.
