

Press release

The Swedish Energy Agency chooses iipax one from Ida Infront

30/11/2018 - Addnode Group's subsidiary, Ida Infront, has been assigned the task of delivering a case management system based on the proprietary iipax one product to the Swedish Energy Agency. The agreement lasts for four years and may be extended by an option. The business value of license, development work and support and maintenance for the first four years is estimated at SEK 10 million.

IT company Ida Infront has signed an agreement with the Swedish Energy Agency regarding consultancy services and licenses for its own product iipax one. The purpose is to support the Swedish Energy Agency in its effort to digitize its processes, thus increasing information quality, flow efficiency and as an effect of increasing customer benefit. The deal consists of license, maintenance and support as well as a number of development projects on an hourly basis during the contract period.

"We are pleased to be in agreement with the procurement and contract so that our journey to next generation information management can begin. We see the investment as a catalyst in our ongoing digitization work", says Lars Berglund, Program Manager, Swedish Energy Agency.

iipax one is Ida Infronts platform-independent information management product for digital smart authorities.

"With its strong focus on user-friendliness, seamless digital flows, automation, integration and digital decision-making, the Swedish Energy Agency has chosen Ida Infront as a supplier through a solid competitive dialogue. We are extremely proud and happy that our product again proves to be the best for governments and municipalities who want to take advantage of the potential of digitization in the best possible way", says Stefan Jonegård, CEO of Ida Infront.

The Ida Infront product iipax features efficient case management, sustainable e-archiving and secure information sharing. The product is available for a wide range of public agencies, but also for private companies.

The Swedish Energy Agency, headquartered in Eskilstuna, has a total view of the supply and use of energy in society with its 450 employees. They work for a sustainable energy system that is safe, competitive and has a low negative impact on health, the environment and climate.
